

ROSS Batch High Shear Mixers 500 Series Specifications and Dimensions

STANDARD FEATURES:

- 1.5 HP through 200 HP.
- Driven by an explosion proof, inverter duty motor.
- Designed to bolt to a standard ANSI flange.
- Equipped with a single mechanical seal designed for vacuum operation.
- Standard single stage rotor/stator supplied with either disintegrating slotted, square hole, or fine screen stator head.
- Stainless steel type 316 wetted parts.
- Non-stainless steel external parts coated with a two-part acrylic urethane enamel coating.
- TEFLON® rotor shaft bushing.

AVAILABLE OPTIONS:

- Double mechanical seals for vacuum and/or pressure applications.
- Washdown and stainless steel motors.
- Variable speed control system, explosion proof operator station, or PLC recipe controls.
- Air/oil hydraulic lift.
- Mobile hydraulic lift on models up to 10 HP.
- Shaft mounted down thrust or circulation propellers.
- Bronze, glass-filled TEFLON®, PEEK, or Stellite bushing.
- Custom shaft length.
- Solids/Liquid Injection Manifold. (SLIM) System for incorporating powders sub-surface, directly into the high shear zone.
- Mix vessel built to customer specifications and requirements.
